

**Opportunities for POSTDOCTORAL RESEARCHERS
in Regenerative Medicine
at the Faculty of Medical Sciences, University of Warmia and Mazury
(FMS-UWM) Olsztyn, Poland**

The FMS-UWM is dedicated to advancing the field of regenerative medicine with the focus on treatment of neurological disorders. Currently it is expanding ongoing preclinical and clinical research programs in cell-based therapy of amyotrophic lateral sclerosis (ALS).

Postdoctoral positions are available on a collaborative project between FMS-UWM and The Johns Hopkins University to study the role of glial cells in pathology of ALS and to assess applicability of grafting glial progenitor cells as a treatment strategy for ALS. Successful candidates will be recent doctoral graduates holding MD or PhD degree with thorough background in cell biology and neurology, and, excellent verbal and written English skills. Must have at least one first author publication in international peer reviewed journal. Previous experience in molecular biology, cell culture, cell transplantation in small or large animals and immunocyto/histochemistry is highly desirable.

We offer three-year contract, internationally competitive salary and stimulating work environment in a multi-institutional, international research group.

Interested candidates should send their applications including C.V., letter of intent and contact information for 3 references to: pwalczak@mri.jhu.edu
